Description: Everything is energy, everything in our existence is connected to a field of electromagnetic vibrational frequencies, and as we know everything made of atoms which produce, emit and receive energy which operates at specific frequency, even our emotions and thoughts have their own electromagnetic fields, as do viruses and bacteria. A healthy human body and all its organs resonates at various certain frequencies, and diseases starts when the frequency drops to a certain level. When the frequency drops because of physiological or emotional or environmental factors, the immune system becomes weak, so viruses, bacteria find it easier to do their work. So if you could eliminate certain outside frequencies that interfered with our bodies, we could have greater resistance toward disease. Through Vibrational Theory we may become cognizant of the relationship existing between the Macrocosm or body of the universe and the human body. Exploring your body's vibrational relationship to physical and mental health is more of an exercise on taking care of yourself based on your personality. For this reason, we developed a miraculous occult method which is known as **Spiritual & Scientific Astrology**. Through this method, we deeply analyse your complete body and all its organs and further identify various frequencies at which they vibrate. On behalf of this frequency analysis, we determine whether your various body organs are healthy or unhealthy.
